

Javelim

High spear weight

- Suitable for green asparagus production
- Medium-early production
- Excellent tip closure
- High percentage of class I
- Visually attractive product

Javelim F1

Javelim is a 100% male hybrid that is ideal for green asparagus production in regions with a temperate climate. Javelim is a medium-early variety with a very high spear weight and excellent tip closure. Thanks to its excellent tip quality, Javelim is suitable for use in a wide geographical area.

Cultivation

Javelim thrives on fertile, well-drained soils. Trials for green asparagus production conducted over several years showed that the best results were achieved with a planting density of 4-6 plants per linear metre with a planting depth of 15- 20 cm. Javelim is a medium-early variety and produces a high percentage of asparagus in the highest quality class.

Product

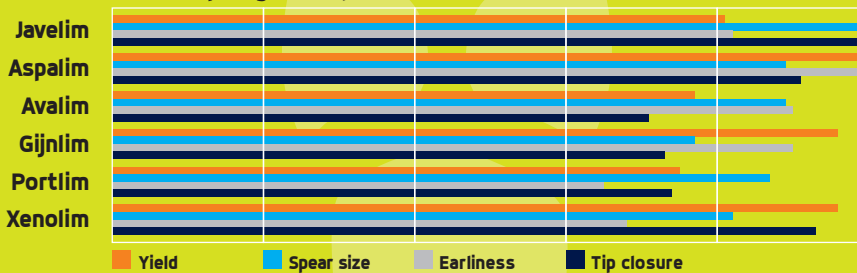

Javelim has a very high spear weight and excellent tip closure, a good yield and remains constant during its production life. Even in warm or hot conditions, the tip of Javelim remains firmly closed. Javelim produces beautifully smooth spears, resulting in a very attractive product.

The plant

Javelim's uniform foliage is dark, erect and vigorous and has an open structure. The foliage is resistant to lodging and stays green for a long time.

The Limgroup varieties at a glance

Green asparagus (temperate climate)

Seeds

All seed supplied by Limgroup is subjected to strict internal quality inspections to test germinating power and varietal purity. Before the seeds are supplied, they are inspected and tested again by Naktuinbouw, an independent inspection service regulated by the Dutch government.
