

# Maralim

**Very flavoursome mid-early variety  
with perfect tip closure**

- High yield potential
- Very good grading
- Perfect tip closure
- Flavoursome
- Beautiful white colour

# Maralim F1

Maralim is a 100% male hybrid and ideally suited for production of white asparagus in a temperate climate. This variety is particularly suitable for the mid-early harvest in Northwestern Europe. Maralim delivers continuous quality through to the end of the season. In terms of yield and quality, Maralim is reliable both in mini tunnels and in open cultivation methods.

## Cultivation

Maralim is a variety that performs best on well-drained sandy soils. Years of practical experience, in Northwestern Europe, have shown that Maralim performs best at planting densities of 5 plants per linear metre. The recommended planting depth under normal conditions is 15 - 25 cm; planting any deeper means harvesting will start later. Sufficient irrigation ensures that Maralim delivers the best quality and highest yields.

## Product

Maralim produces a typical white, straight asparagus. The variety produces asparagus with the best tip closure in its segment and high resistance to breakage, hollowing, pink discoloration, or rust. Most of the grading is in the class 20 - 28 mm. Consumers rate Maralim as very flavoursome. The perfect tip closure allows harvesting rhythms to be adjusted, without compromising on quality. The high yield and good grading translate into more Class 1 kilos, resulting in a higher yield per hectare.

## The plant

The foliage of Maralim is compact and not susceptible to lodging. Despite the fact that the foliage dies off naturally early in the autumn, a good store of reserves is built up for the plant.

## The Limgroup varieties at a glance

## Seeds

All seed supplied by Limgroup is subjected to strict internal quality inspections to test germinating power and varietal purity. Before the seeds are supplied, they are inspected and tested by Naktuinbouw, an independent inspection service regulated by the Dutch government.
